This rich trove of current and past statistics on the countries of the world makes historical and cross-national comparisons easy. Plus, World Data Analyst allows subscribers to create tables or charts and even export the information to a spreadsheet for data crunching and deeper analysis. Users can also link to country articles from the Britannica Concise Encyclopedia. It's ideal for research, to explore new topics for study, or just to learn more about the world.

Country Snapshots

Easy access to printable country maps and statistics such as area, population, demographic and vital statistics, gross national product, and more.

Country Comparisons

Create your own tables and graphs to compare countries using the most recent statistics or historical statistics, which show changes in countries over time.

Ranked Statistics

See how different countries compare on economic and population measures or get information on significant geographic features such as highest mountains and largest deserts.

What countries produce the most grain?

Does Australia or France have a higher percentage of paved roads?

Where are the world's highest waterfalls?
